## **MEMORANDUM**

DATE: January 23, 2024

TO: Board of Directors

Temescal Valley Water District

FROM: General Manager

SUBJECT: Revised budget for Well 1A Rehabilitation CIP NP-2323-03.

#### **BACKGROUND**

The AG wells on Leroy Road were constructed with mild steel and the perforations were installed with a process that cuts slots to create a screen that allows water in but keeps the sand out. The mild steel has failed in both wells. We repaired Well 4 in 2022 and installed a new pump at a total cost of approximately \$187,000. The work was completed in two phases. We budgeted for the repair of Well 1A in FY 23/24 per the attached sheet. The budget cost only used the Well 4 liner repair cost with an adjustment for inflation.

The final cost to repair Well 1A and install a new pump is \$153,162 approximately \$30K lower than Well 4 since we are doing all the work at one time, but \$26,162 more than budgeted. We have purchased the materials including the stainless-steel liner, pump, and column pipe and scheduled the work in February to correspond with reduced demand.

#### FISCAL IMPACT

Original Budget - \$127,000 Final Cost estimate - \$153,162.06

#### **RECOMMENDATION**

At the discretion of the Board:

1. Authorize the General Manager to increase the budget for Well 1A repair and pump replacement by \$26.162.00.

Respectfully submitted,

Jeff Pape

General Manager

Project Well Rehabilitation

Project Department: Non-potable CIP Project No.: NP-2023-03 **Total Project Cost:** \$ 127,000

#### **Project Description:**

The district has two wells (Wells 1A and 4) that are lined with mild steel and were constructed with slots punched into the sides to act as a screen to keep out the sand and gravel. We completed the sleeving and rehabilitation of Well 4 last year and need to complete the work on Well 1A. We will complete the work in the middle of the rainy season when non-potable demand is low.
